

The New Hampshire Department of Environmental Services coordinates a growing group of business leaders committed to bringing about a more sustainable New Hampshire — the **Environmental Leadership Initiative**.

Aspiring Leaders is the first tier of DES's voluntary, non-regulatory Environmental Leadership Initiative (www.des.nh.gov/eli) that recognizes the many voluntary efforts of businesses and other organizations in New Hampshire that improve our environment and economy. *Aspiring Leaders*' objectives are simple: to encourage individuals, organizations and businesses to do more than the required minimum to improve our environment and economy.
